Program Description

A Bachelor of Textile and Fashion Design is a degree that teaches students how to create and innovate with fabrics, materials, and garments. Students in this program learn how to weave, dye, print, construct, pattern, illustrate, and design textiles and fashion products. Graduates of this program are ready for careers in various textile and fashion industries, where they can use their skills to design, produce, and market textiles and fashion. A Bachelor of Textile and Fashion Design is a degree that combines creativity and technique with textiles and fashion
