

Program Description

The Bachelor of Science in Natural Resource Management is a dynamic program designed to equip students with the knowledge and skills needed to sustainably manage natural resources. Through a blend of theoretical coursework and hands-on field experiences, students learn about the principles of conservation, ecology, and environmental policy. They explore the complex interactions between human activities and the natural environment, gaining an understanding of how to balance resource utilization with conservation efforts. Graduates are prepared for careers in environmental consulting, forestry, wildlife management, and more, where they play a crucial role in protecting and managing our natural resources for future generations.

Bachelor of Science in Natural Resources Management

Knowledge | Innovation | Excellence
