

## Program Description

Bachelor of Science in Agricultural Extension is a degree that trains students to work as professionals in the field of agricultural and rural development. Students in this program learn how to plan, implement, and evaluate extension and development programs that aim to improve the livelihoods of farmers and rural communities. They also learn how to conduct research, facilitate trainings, promote agricultural technologies, and organize farmers' associations. Graduates of this program are prepared for careers in government service, NGOs, agri-business, and Academia, where they can use their skills to advance science and improve health outcomes.
