

Program Description

The BSc in Horticultural Sciences and Landscape Design program is designed to develop graduates with a comprehensive education for edible horticulture and landscaping careers in industry, consulting, government, and academia. This program is designed to provide students with the knowledge and skills needed for production, management and marketing of fruit, vegetable, landscape, floriculture and other ornamental crops, or designing, building and maintaining residential or small-scale commercial landscapes. Horticulture has high potential to improve nutrition and create jobs, not only through farming, but also through value addition by SMEs that mainly benefit women and children. At LUANAR, the potential of horticulture sector in contributing to income generation is clear.

Bachelor of Science in Horticultural Sciences and Landscape Design
