

Program Description

The Bachelor of Education Science program merges scientific disciplines with education, training future secondary school science teachers. With a curriculum covering biology, chemistry, physics, and more, students learn to effectively impart scientific knowledge and foster critical thinking. In Malawi, international and regional protocols stress the importance of quality education, aligning with LUANAR's role in preparing teachers for the post-2015 development agenda. The program addresses the shortage of science teachers, particularly in rural areas, promoting STEM education and entrepreneurship in agriculture.

Bachelor of Education Science

Knowledge | Innovation | Excellence
