

Program Description

The Bachelor of Science in Agriculture offers a comprehensive understanding of agricultural principles, covering crop production, soil science, animal science, and sustainable practices. In Malawi, where agriculture is vast and evolving, graduates play a crucial role in advancing farming techniques. With research institutes focusing on technology development and organic farming, opportunities abound for graduates to contribute positively. They can pursue careers in various sectors like food processing, dairy, and consultancy, both locally and abroad. The program aims to produce competent graduates adept at integrating science and technology for sustainable farming, problem-solving, and enterprise management. Ultimately, graduates drive innovation and contribute significantly to the economy through agriculture.

Entry Requirements:

MSCE Certificate or its equivalent with at least six credit passes including English, Mathematics, Biology and Physical Science or Chemistry and Physics.

A level certificate with minimum grade of C in English, Mathematics, Biology, Chemistry and Physics will be considered for entry at second year.
