

Program Description

The Bachelor of Science in Crop Sciences program is designed to provide students with a comprehensive understanding of crop production, plant biology, agronomy, and sustainable agriculture practices. This program focuses on the study of crops, their cultivation, management, and the science behind maximizing crop yields and quality. Students in this program study a range of topics, including plant genetics, physiology, pathology, pest management, soil science, crop nutrition, weed control, and precision agriculture. They also learn about sustainable agricultural practices, environmental impact assessments, and crop protection strategies.

Entry Requirements:

MSCE Certificate or its equivalent with at least six credit passes including English, Mathematics, Biology and Physical Science or Chemistry and Physics.

A level certificate with minimum grade of C in English, Mathematics, Biology, Chemistry and Physics will be considered for entry at second year.

DURATION: 4 YEARS
CAMPUS: BUNDA COLLEGE
