

Program Description

The BSc Food Science and Technology program addresses critical issues in Malawi's agricultural sector, where post-harvest losses and substandard food processing hinder economic growth. By blending theoretical knowledge with practical skills, the curriculum focuses on reducing post-harvest losses, enhancing food safety, and promoting entrepreneurship. Graduates emerge equipped to transform raw agricultural produce into high-quality, nutritious, and safe food products. Through hands-on experiences and industry attachments, students gain insights into food processing and quality management. The program emphasizes innovation, preparing students to create novel food products that meet evolving consumer demands. Ultimately, it aims to empower graduates to drive positive change in Malawi's food industry while fostering self-reliance and entrepreneurial spirit.

Entry Requirements:

MSCE Certificate or its equivalent with at least six credit passes including English, Mathematics, Biology and Physical Science or Chemistry and Physics.

A level certificate with minimum grade of C in English, Mathematics, Biology, Chemistry and Physics will be considered for entry at second year.

DURATION: 4 YEARS
CAMPUS: BUNDA

Bachelor of Science in Food Science and Technology
