

Program Description

The Bachelors of Science in Irrigation Engineering (Honors) program is designed to equip students with the technical skills and knowledge to effectively manage water resources for Agricultural purposes. Through a comprehensive curriculum, students will gain expertise in various aspects of irrigation engineering, including water resource management, hydraulic structures, irrigation systems design, and sustainable irrigation practices. The honors segment of the program provides academically driven students with the chance to participate in research projects guided by faculty mentors. The program lays a solid foundation in related fields such as water resources engineering, environmental management, and agricultural science.

Bachelor of Science Irrigation Engineering (Honors)

Knowledge | Innovation | Excellence
