

Program Description

A Bachelor of Veterinary Medicine (BVM) degree program is a that equips students with the knowledge and skills needed to become veterinary professionals. This program combines classroom instruction, laboratory work, clinical experience, and hands-on training to prepare students for careers in veterinary medicine. A Bachelor of Veterinary Medicine program covers key components such as animal science and biology, veterinary medicine courses, clinical experience, and professional skills development. Students learn about animal biology, physiology, anatomy, genetics, nutrition, and behavior, as well as veterinary pharmacology, pathology, microbiology, surgery, anesthesia, and public health.

Bachelor of Veterinary Medicine

Knowledge | Innovation | Excellence
