

Program Description

The Bachelor of Science in Agricultural Economics program merges principles of economics with agricultural practices, analyzing resource allocation in farming and agribusiness. Students gain insights into economic theories and their practical applications in agriculture, preparing them for roles in farm management, agricultural marketing, policy analysis, and agricultural finance. Through a blend of theoretical coursework, practical experiences, and research projects, students develop analytical skills crucial for addressing challenges in agriculture. Graduates are equipped to contribute to the sustainable development and profitability of agricultural enterprises, making informed decisions in a dynamic agricultural landscape.

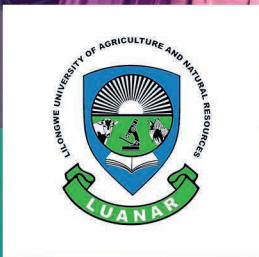

Entry Requirements:

MSCE Certificate or its equivalent with at least six credit passes including English, Mathematics, Biology and Physical Science or Chemistry and Physics.

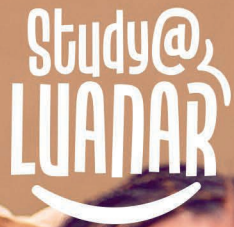

A level certificate with minimum grade of C in English, Mathematics, Biology, Chemistry and Physics will be considered for entry at second year.
