Program Description

The Bachelor of Science in Environmental Engineering (Honors) program is designed to equip students with the knowledge and skills to address complex environmental challenges through engineering solutions. The rigorous program integrates principles of engineering, biology, chemistry, and environmental science to train students in areas such as water resources management, air quality control, waste treatment, and sustainable design. The honors designation offers students opportunities for advanced research, specialized coursework, and mentorship from faculty experts in the field. Honors students will focus into topics such as air quality management, renewable energy systems, and ecological solutions, culminating in a capstone project demonstrates their mastery of environmental engineering principles.

Entry Requirements:

MSCE Certificate or its equivalent with at least six credit passes including English, Mathematics, Biology and Physical Science or Chemistry and Physics.

A level certificate with minimum grade of C in English, Mathematics, Biology, Chemistry and Physics will be considered for entry at second year.

DURATION: 5 YEARS
CAMPUS: BUNDA COLLEGE

a **University** with
endless possibilities

Career Prospects:

Environmental engineer
Water resources Engineer
Environmental Consultant
Environmental Health and
Safety Specialist
Urban Planner
Research Scientist
Government Regulator etc.

Make your
ambitions
a reality.
