Program Description

This is a 4-year program that equips students with the knowledge and skills to address complex environmental challenges. Through a multidisciplinary approach, students learn about environmental science, policy, and management, gaining a deep understanding of environmental issues and solutions. The program emphasizes practical, hands-on learning, with opportunities for fieldwork, internships, and research projects. The graduates from this program will complement the government's efforts in enhancing its adaptation, mitigation, and resilience programs which are meant to support Malawians.

Entry Requirements:

MSCE Certificate or its equivalent with at least six credit passes including English, Mathematics, Biology and Physical Science or Chemistry and Physics.
